## Profile Summary

---

NPI Engineer with 6.5+ years of experience in New Product Introduction (NPI), Manufacturing Engineering, Quality Systems, and Process Improvement. Experienced in managing product builds from Prototype and Pilot stages to Mass Production Handover. Skilled in PFMEA, Control Plans, RCA, CAPA, ECN Implementation, Fixture Validation, Yield Improvement, and cross-functional team coordination. Also experienced in Manufacturing Automation, Google Apps Script, Workflow Automation, and Dashboard Development..

---

## Work Experience:

### VVDN Technologies

*NPI Engineer | DEC 2025 – Present*

- \* Managing complete New Product Introduction (NPI) lifecycle from PPR/Prototype build to Mass Production Handover.
- \* Driving manufacturing readiness activities including process validation, fixture validation, tooling qualification and production trials.
- \* Coordinating with Design, MES, Software, Quality, Production and Supply Chain teams for successful product launches.
- \* Leading root cause analysis (RCA), CAPA implementation and issue closure during prototype, pilot and production phases.
- \* Working on ECN/ECO implementation and manufacturing change management activities.
- \* Monitoring and improving cycle time, productivity, manufacturing cost and process efficiency.
- \* Supporting MES deployment, process flow creation and production system readiness.
- \* Creating and reviewing manufacturing documentation including PFMEA, Control Plan, PFC, WI and validation reports.
- \* Managing production ramp-up activities and ensuring smooth transition from NPI to mass production.
- \* Driving yield improvement, defect reduction and continuous process optimization initiatives.

## Optimus electronics limited.

### Process Engineer (NPD) (SEP. 2025 – Present)

- Supported **NPI/NPD projects** from concept to production by ensuring process feasibility, manufacturability (DFM/DFA), and seamless transition into mass manufacturing.
- Developed and optimized **process flow, work instructions, and control plans** to support new product introduction and line readiness.
- Collaborated with cross-functional teams (R&D, Quality, Production, Supply Chain) to drive **design reviews, process risk assessments (PFMEA), and corrective actions**.
- Executed **root cause analysis (RCA)** and implemented **CAPA** for process deviations and build issues during new product launches.
- Managed small-to-medium scale **process improvement and automation projects**, focusing on cycle time reduction, cost optimization, and yield improvement.
- Supported prototype development and **material/process validation** ensuring alignment with customer requirements and industry standards.
- Drove **continuous improvement initiatives (Lean, Kaizen, 5S)** to enhance process stability and reduce production waste.
- Worked on equipment installation, capability studies, and **line setup for new product builds**, ensuring readiness for mass production.

## CLN Energy Ltd.

### Quality Engineer (NPD) (April 2025 – September)

- Led Process Failure Mode and Effects Analysis (PFMEA) and implemented process controls during NPI to minimize risks and ensure quality standards.
- Coordinated pilot production phases, including gap analysis, testing procedures, and process optimization for new product launches.
- Conducted root cause analysis (RCA) and applied corrective actions (CAPA) to address NPI-related quality issues and improve processes.
- Developed and validated test procedures, ensuring compliance with performance, durability, and safety standards during NPI.
- Managed the creation and maintenance of Control Plans, Work Instructions (WIs), and Standard Operating Procedures (SOPs) for NPI.
- Led defect tracking and continuous improvement efforts for NPI products, ensuring quick resolution and feedback loops.
- Supported product launch by monitoring early-phase performance and implementing corrective actions based on customer feedback.
- Conducted quality audits during NPI phases to ensure compliance with internal and customer-specific quality standards.
- Prepared and analyzed 8D reports for customer complaints and warranty issues, identifying root causes and corrective actions.
- Ensured seamless coordination between design, engineering, and production teams to maintain product quality throughout NPI stages.

## Dixon Technology, Noida Pvt Ltd

### Quality Auditor (Sep 2024 – April 2025)

- Conduct **line rejection analysis** and provide feedback for process improvement.
- Monitor **market feedback (VOC)** and implement **Corrective and Preventive Actions (CAPA)**.
- Perform **daily line audits, process parameter validation, and SFG audits** as per WI.
- Ensure **non-conformance (NC) closure** through CAPA on the production line.
- Oversee **OQC inspections** and failure resolution.
- Manage **quality reports** (FAI, process inspections, line rejection analysis).
- **Train production and quality teams** for new deployments and rejection handling.

## Gradus Marketing Pvt Ltd

### Supervisor(NPD) (Jan 2024 – Aug 2024)

- **Managed shift operations**, including quality inspection and workforce supervision.
- Controlled **material inflow/outflow and inventory management**.
- Executed **production and quality plans** as per customer specifications.
- **Trained manpower** to handle market quality issues.
- Oversaw **assembly and packaging** to ensure compliance with customer requirements.
- Maintained **daily production data and inventory Tracking**.

## Bhart Techno

### Supervisor(NPD) (May 2021 – Aug 2023)

- Provided **daily safety training** to manpower for secure and efficient operations.
- **Planned cable routing** as per **engineering diagrams** and ensured proper implementation.
- **Managed cable cutting, pulling, and laying** as per project requirements.
- Supervised **panel setup & positioning** based on layout diagrams.
- **Executed cable termination & testing** to ensure accurate connections.
- Maintained **daily progress reports** (cables installed, terminations completed, panel shifts).
- Sent **daily project updates via email** to engineers & management.

## Elite Powertech Pvt Ltd

### Shift Engineer (2019 – 2021)

- Responsible for overall shift management.
- Management of the logbook and job card for each work.
- Power and load management of local area power supply.
- Scada load management, tripping and shutdown.
- Local area inspection for all kinds of faults.

# Certification

✓ Digital Marketing (Frontend & Backend)

# Education

---

- 🎓 **Diploma in Electrical Engineering** – BTE UP, Lucknow (2019) | **70%**
- 🎓 **12th (PCM)** – Rail Karm Chari Inter College (2017) | **52%**
- 🎓 **10th** – Gurudwara Inter College (2015) | **63%**

## TECHNICAL SKILLS

---

- ✓ **Microsoft Office Suite** (Word, Excel, PowerPoint, Access)
- ✓ **SCADA & Load Management**
- ✓ **Quality Control & Auditing**
- ✓ **Process Improvement & CAPA Implementation**
- ✓ **Digital Marketing & SEO**

### **BOM Scrubber**

- **Automated BOM validation using DigiKey and others API.**
- **Package and description matching.**
- **Automated report generation.**

### **Task Management System**

- **Workflow automation.**
- **Email notifications.**
- **Approval and reminder system.**

### **Event Visitor Management System**

- **QR registration and verification.**
- **Attendance tracking dashboard.**
